

10. (canceled)

REMARKS

SPECIFICATION

The triple and quadruple brackets have been removed and replaced by strickethroughs and underlines as appropriate.

To comply with Examiner's suggestion to replace the expression « slat tab » with the expression « protrusion received within a socket » in claim 7, it was necessary to introduce the expression in the specification where appropriate, hence the amendment which does not introduce new matter but rather relabels an existing element.

CLAIMS

An amended claim 7 is presented and claim 10 is canceled.

Hoping that this application can be placed in allowable condition as soon as possible and without the need for further proceedings.

Very Respectfully,

---

Mustapha El Ghermaai
